

Fahim Amiri

Full Stack Web Developer

San Francisco Bay Area, CA | +1 510 395 3347 | Fahim.amiri21@gmail.com | [GitHub](#) | [LinkedIn](#) |

TECHINICAL SKILLS

Frontend: React.js, Hooks, Context API, JavaScript, HTML, CSS, Swift UI, Java, C++, Python, Figma, Adobe XD, Adobe Package.

Backend: Node.js, Express, PostgreSQL, MongoDB, SQL Workbench, Git, GitHub, NPM, Maven, SSL, AWS, GCP, Render, and GoDaddy.

Additional: Agile Project Management, Algorithms, Architecture, Debugging, Deployment, Jira, and VS Code.

PROJECTS

CoderHeroes, Frontend Developer

Skills - Asana & Trello, Jira, Figma, React-Router-Dom, JavaScript, GitHub, Website Development

- Collaborated with diverse development teams, coordinating project tasks using Trello and Jira.
- Designed intuitive dashboard components using JavaScript and React-Router-Dom, enabling real-time course progress visualization and additional resources for students and instructors.
- Provided weekly progress insights and development recommendations to stakeholders, release managers, and the team.

UNO Game, Team Project

Skills- Java, NPM, Git, HTML, CSS, JavaScript, Figma, Render PostgreSQL | [GitHub](#)

- Achieved the goal of delivering a fully functional UNO game where users can track their win/loss records, implementing all project requirements in the backend and frontend.
- Managed team coordination and progress tracking to ensure timely project completion.
- Utilized Git for version control and Figma for UI/UX design.
- Resulted in a polished and engaging game experience, enhancing users' ability to monitor their performance and improving team collaboration and technical skills.

Tourme APP and Web Application, Team Lead | [GitHub](#)

Skills: Figma, Workbench, SSL, GCP, HTML, CSS, Swift, JavaScript, Java, Git, GitHub, NPM, Visual Studio

- Led the design team in creating wireframes and storyboards with Figma to improve user navigation and enhance the overall user experience, resulting in a more intuitive app and web interface.
- Developed the frontend using HTML, CSS, Swift, and JavaScript, and integrated with a Java-based backend; implemented secure backend services with Workbench, GCP, and SSL.
- Managed version control and collaboration using Git and GitHub, utilizing NPM for package management and Visual Studio for development..

Car Rental Database Project.

Skills: Python, Discord, Discord Developer, Replit, Workbench SQL | [GitHub](#)

- Developed an interactive bot using Python and Discord Developer tools, allowing users to seamlessly interact with the car rental database.
- Utilized Workbench SQL for efficient database management and queries, ensuring robust data handling.
- Employed Replit for collaborative coding and project deployment, adhering to industry-standard practices and milestone-based progress tracking.
- Outcome : Enhanced user engagement and operational efficiency, achieving faster response times and improved data management.

Real Estate App, Full Stack Developer

Skills: React.js, EmailJS, React-Router-Dom, Vercel, GitHub, Website Development | [GitHub](#) | [Website](#)

- Developed a React-based portfolio site for real estate agents, showcasing business services and contact information.
- Implemented user-friendly features, including a customized inquiry submission form, enhancing client engagement.
- Integrated EmailJS for real-time inquiry notifications and deployed the site using Vercel for seamless hosting and performance.

EXPERIENCE

Project Manager, Chaix Company (Full-Time)

Jan 2023 – Present

- Analyzed project requirements, prepared bids, and conducted site visits; collaborated with sales and engineering teams for accurate measurements and documentation.
- Managed project execution, timelines, budgets, and quality standards; maintained strong client relationships and resolved project-related issues through regular follow-ups and meetings.

Front-end Developer, Freelancer (Full-Time)

Aug 2019 – Dec2023

- Demonstrated end-to-end project ownership, designing and developing websites and applications using HTML, CSS, JavaScript, Swift, Node.js, and APIs; managed databases including MongoDB, SQL Workbench, and Postgres.
- Collaborated with stakeholders and cross-functional teams, including designers and back-end developers, to iteratively grow MVPs into mature solutions; used Figma for wireframing and prototyping.
- Regularly participated in design and code reviews, ensuring quality and adherence to project requirements; developed mobile app pages with Flutter's UI framework and stayed updated with the latest web design trends and tools.

Web Designer, Tolo TV & Darya App (Remote)

Jan2018 – May 2019

- Designed and maintained websites and applications for daily news updates, TV program marketing, and advertisements using HTML, CSS, JavaScript, Swift, Node.js, and APIs.
- Managed MongoDB, SQL Workbench, and Postgres databases to ensure efficient data handling for dynamic content updates.
- Developed mobile app pages with Flutter and utilized Adobe Illustrator and CorelDRAW for wireframing and prototyping, optimizing for responsiveness and performance.

Teacher Assistant, Laney College (Part-Time)

Aug 2021 – Dec 2020

- Supported over 50 students in comprehending computer science concepts such as object-oriented programming and data structures.
- Conducted thorough code reviews and offered constructive feedback to enhance understanding and programming skills.

EDUCATIONS

San Francisco State University Backend, Bachelor 's in computer Science

May 2024

Kardan University, Bachelor's in business administration Specialized in Management

Dec 2014
